Parental Leave Information:

If you will be **going on** parental leave sometime in 2025, you still need to renew as usual (because you will be working before going on your leave).

If you will be **returning from** parental leave before July 1, renew as usual to take advantage of the early bird discount.

If you will be **returning from** parental leave after July 1, it is recommended to renew as usual, however; you can cancel your registration by submitting a Notice of Non-Practice and not renew your registration for 2025 and then reinstate your registration after July 1. Choosing this route requires you to obtain a criminal record check and submit copies of your education and certification but you pay 50% of the MLT dues.
